Traex® Full-Size Open-End Sheet Pan Rack

This full-size beige open-end rack easily holds cafeteria trays or full size sheet pans during washing in your commercial kitchen. It is open-ended on one side for easy placement and removal of trays of all lengths. Add a chrome wire insert (sold separately) to hold pans upright for washing, and a sheet pan rack becomes the best way to wash large trays and pans in a commercial conveyor dishwasher! This rack comes in a beige color, making it the perfect addition to a color-coded warewashing system. When combined with racks of other colors and configurations (sold separately), this rack allows you to see at a glance what it should be used for, preventing cross contamination and ensuring that all of your sheet pans and other items are washed in correctly sized racks.
