Miramar® resin template for three long rectangular Miramar contemporary food pans in white stone

The Miramar resin template by Vollrath fits perfectly into your standard-size well opening, warmer or chafer, and the three cutouts hold long rectangular Miramar contemporary food pans perfectly. Made of durable thermoset resin, this template works for both hot and cold applications and is heat-resistant up to 300°F. It won't warp or fade, and the underside features an integral rib design that provides extra strength and secures the template into the well.
