VOLLRATH

69521

208- to 240-volt 2900-watt Professional-Series drop-in induction range

The Professional-Series drop-in induction range by Vollrath is a powerful, versatile addition to your commercial kitchen lineup. With impressive induction technology, this drop-in range is a valuable addition to any lineup and approximately 40 percent more efficient than electric or gas. It features a framed ceramic top that's equally sleek and durable, and the countersunk installation creates a streamlined work surface. The digital remote control offers high-speed temperature adjustments and 100 different power or temperature settings for impressive accuracy, while the flat face prevents accidental temperature changes. With continuous-duty induction circuitry, this induction range is made for nonstop cooking.
